

THAAD

Terminal High Altitude Area Defense

THAAD is designed to intercept threats both inside and outside the atmosphere in addition to providing significant mass raid capability. THAAD is combat proven and uses Hit-to-Kill technology to enable its lethal aim-point accuracy against short, medium and intermediate-range ballistic missiles.

Ability to intercept missiles inside and outside the atmosphere

Defends population centers and high value infrastructures

Interoperable with other ballistic missile defense systems

Highly mobile and deployable worldwide

Milestones

100%
successful flight tests
16 for 16 intercepts

\$1.42 Billion
contract award for
THAAD interceptors
March 2022

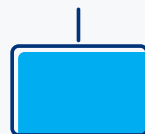

\$74 Million
contract award for
an 8th U.S. THAAD battery
April 2022

Interceptor Deliveries

Expanding production facilities to meet global demand

Active Batteries:
7 United States
2 United Arab Emirates

International Customers:
United Arab Emirates
Kingdom of Saudi Arabia

Global Footprint

18,000+ direct & indirect jobs

742 suppliers
42 states
